Workforce Growth Map

Revenue growth vs average headcount growth • Bubble size = quarterly revenue

METRIC	Cost Amount	Cost Change YoY	Cost Growth YoY %	Cost PY Comparable
Communication	205.05	45.77	28.7%	159.28
Cost of Equipment and Software Licenses	374.11	93.37	33.3%	280.74
Depreciation	261.48	32.87	14.4%	228.61
Employee Cost	7,921.86	1,930.05	32.2%	5,991.81
Facility Expenses	575.43	101.37	21.4%	474.06
Fees to External Consultants	923.60	345.08	59.6%	578.52
Other Costs	762.92	306.36	67.1%	456.56
Provision for Doubtful Debts	11.13	14.37		-3.24
Travel	406.26	93.35	29.8%	312.91

Is staffing supporting revenue?

2Q13 | Matching-quarter YoY • Revenue: +34.3% | Margin: -0.36 pp. • Cost pressure: Other Costs (-₹149.9 Cr profit contribution). • Workforce: Average headcount +19.3%; revenue/employee +12.5%. • Next step: Investigate Other Costs by separating volume, price, timing and classification effects.

COST PRIORITY: Investigate Other Costs, the largest identified cost pressure; separate price, volume and timing effects. **WORKFORCE:** Validate whether higher revenue per employee reflects sustainable demand and delivery improvements before expanding hiring.

MEA	+2.5%	+2.2%	+0.3 pp	+7.6%	-1.8%	-0.2 pp

PERFORMANCE | 1Q27: Company revenue grew 3.2% YoY in constant currency; the top two regions contribute 65.5% of revenue. EXPOSURE | 19.2% of revenue comes from contracting regions. UK is the largest, representing 17.2% of revenue with CC growth of -0.6% YoY. ACTION | Prioritise UK: investigate client demand, renewals and project timing; assess opportunities in growing regions to reduce reliance on a few markets.

PRIORITY: Review UK first—the largest contracting region; investigate demand, renewals and project delays. NEXT: Monitor the 19.2% revenue exposure to contracting regions and assess expansion opportunities in growing markets.

SC Profit Change

-₹6,826.43 Cr

What Changes Operating Profit?

Revenue uplift and cost changes versus the base quarter | ₹ crore

Base Quarter vs Scenario

Compare the financial outcome of your assumptions

Metric	Base	Scenario	Change
Revenue	72,275.00	66,493.00	-5,782.00
Employee cost	42,137.00	43,822.48	1,685.48
Other operating costs	12,821.00	12,179.95	-641.05
Operating profit	17,317.00	10,490.57	-6,826.43

WHAT THIS PAGE SHOWS: If TCS earns more or less revenue and its costs change, how much operating profit would remain?

YOUR ASSUMPTIONS: Starting from 1Q27, revenue decreases by 8.0%, employee costs increase by 4.0%, and other operating costs decrease by 5.0%.

RESULT: Operating profit would change from ₹17,317.0 Cr to ₹10,490.6 Cr—a decrease of ₹6,826.4 Cr. For every ₹100 of revenue, about ₹15.8 would remain as operating profit.

WHY IT HELPS: Compare growth plans and spending changes to see which combinations protect profit.

These are possible outcomes under your assumptions, not predicted results. Revenue and costs change independently.

Revenue Sensitivity

How revenue changes affect profit under the selected cost assumptions

GROWTH: Strengthen client retention and renewals, investigate delayed projects, and assess cross-selling opportunities. Prioritise contracts with sustainable pricing and reliable payment terms. **PROFIT:** Operating profit falls under these assumptions. Review employee utilisation, consultant spending and pricing; revenue must change by at least +1.4% versus the base to preserve profit at the selected cost levels. **RISK:** Phase hiring and purchases against confirmed demand. Monitor project delivery, client collections and spending, and revise assumptions when business conditions change.
